

Editors**GIAMPIETRO FARRONATO**

MD, Odontostomatology and Orthodontics specialist
Full professor, Odontostomatological Disease
Director, Postgraduate School of Orthodontics
Dean, Dental Hygiene Undergraduate Course
School of Medicine and Surgery - University
of Milan

RAVINDRA NANDA

BDS, MDS, PhD, Professor Emeritus
Former UConn Orthodontic Alumni, Endowed Chair
Former Professor and Head
Department of Craniofacial Sciences Chair,
Division of Orthodontics
University of Connecticut
School of Dental Medicine
Farmington, CT 06030-1725, USA

Co-editors**CINZIA MASPERO**

MD, Odontostomatology and Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
and Dental Medicine and Prosthodontics
Undergraduate Course - University of Milan

UMBERTO GARAGIOLA

DDS, Orthodontics and Odontostomatological
Surgery specialist
PhD in Oral and Maxillofacial Surgery
University researcher
University of Milan

Co-authors**ERSILIA BARBATO**

DDS, Orthodontics specialist
PhD in Odontostomatological Disease
Full professor, Orthodontics
Dean, Dental Medicine and Prosthodontics
Undergraduate Course
School of Medicine and Dentistry - Sapienza
University of Rome

FELICE FESTA

MD, Odontostomatology and Orthodontics specialist
Full professor, Orthodontics II and Gnathology II
Director, Postgraduate School of Orthodontics
School of Medicine and Surgery - University
of Chieti-Pescara

CLAUDIO CHIMENTI

MD, Odontostomatology, Orthodontics
and Otolaryngology specialist
Full professor, Orthodontics
Department of Surgical Sciences
School of Medicine and Surgery - University
of L'Aquila

ALDO BRUNO GIANNI

MD, Full professor, Maxillofacial Surgery
Director, Department of Biomedical, Surgical
and Dental Sciences - University of Milan
Director, Operative Unit of Maxillofacial Surgery
and Odontostomatology
Fondazione IRCCS Ca' Granda Ospedale Maggiore
Policlinico of Milan

GIANCARLO CORDASCO

MD, Odontostomatology specialist
Full professor, Odontostomatological
and Oral Disease
Director, Department of Surgical Sciences
and Odontostomatology
School of Medicine and Surgery - University
of Messina

ROSALIA MARIA LEONARDI

DDS, Full professor
Dean of the School of Dentistry
Head of the School of Orthodontics
University of Catania

PAOLA COZZA

MD, Full professor, School of Medicine and Surgery
Department of Clinical Sciences
and Translational Medicine
Director, Postgraduate School of Orthodontics
Director, 2nd level Master in Orthodontics -
University of Rome "Tor Vergata"
Manager, Operative Unit of Orthodontics -
Policlinico Tor Vergata Foundation,
Rome

CONCEPCIÓN MARTÍN ÁLVARO

DDS, Orthodontics specialist
Full professor, Dental Medicine
and Prosthodontics Undergraduate Course
and Postgraduate School of Orthodontics
Complutense University of Madrid

LETIZIA PERILLO

MD, Full professor, Orthodontics
Chair of Postgraduate Orthodontic Program
Head of the Orthodontic Division
School of Medicine and Surgery - University
of Campania "Luigi Vanvitelli",
Naples

Contribution by

ALESSANDRO AGAZZI

MD, Maxillofacial Surgery specialist

DARIO ALBERZONI

DDS, Orthodontics specialist
University of Milan

GIORGIO ALESSANDRI

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

FAUSTO ASSANDRI

MD, Odontostomatology
and Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

MONICA AVRAMO

DDS, Orthodontics specialist
University of Milan

ALESSANDRO BAJ

MD, Maxillofacial Surgery specialist
University researcher
University of Milan

CARMELO BATIA

MD, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

SALVATORE BATIA

DDS, Odontostomatological Surgery specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

GIACOMO BEGNONI

DDS, Orthodontics specialist
University of Milan

FRANCESCA BELLINCIONI

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

CLAUDIO BELLINTANI

MD, Rheumatology and Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

FREDERICK BERARDINELLI

DDS, Orthodontics specialist
University of Milan

LUDOVICA BIANCONE

DDS, University of Chieti-Pescara

ENRICO BRIGUGLIO

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics

FRANCESCO BRIGUGLIO

DDS, Odontostomatological Surgery specialist
PhD in Maxillofacial Surgery
University of Messina

VERA CARLETTI

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

SABRINA CASELLA

DDS, Orthodontics specialist
University of Milan

NICCOLÒ CENZATO

DDS, Orthodontics specialist
University of Milan

ROBERTO CORNALBA

MD, Orthopedics and Traumatology specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

GIANGUIDO COSSELLU

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

ANTONELLA COSTA

MD, Neurology and Radiology-Neuroradiology
specialist
Adjunct professor, Postgraduate School
of Neurology
University of Milan

PAOLO CRESSONI

MD, DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

FRANCESCA CURRÒ

DDS, Orthodontics specialist
University of Milan

MARIA LAURA CUZZOCREA

DDS, Orthodontics specialist
University of Milan

GILDA DELL'ANGELO

DDS, University of Chieti-Pescara

ETTORE DEL ROSSO

DDS, Odontostomatological Surgery specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

SANDRO DE NARDI

MD and Physics graduate
Nuclear Medicine specialist
University of Milan

CHRISTIAN DICKERS

DDS, Orthodontics specialist
University of Milan

ALDO DANIELE DOMINICI

DDS, Odontostomatological Surgery specialist
University of Milan

LUCA ESPOSITO

MD, DDS, Orthodontics
and Odontostomatological Surgery specialist
Adjunct professor, Postgraduate School
of Orthodontics and Dental Surgery
Undergraduate Course
University of Milan

DAVIDE FARRONATO

DDS, Odontostomatological Surgery specialist
PhD in Techniques for implant-retained restorations
University researcher
University of Insubria, Varese

MARCO FARRONATO

DDS, Orthodontics specialist
University of Milan

MARIA CARMELINA FIMMANÒ

DDS, Orthodontics specialist
University of Milan

GUIDO GALBIATI

DDS, Orthodontics specialist
University of Milan

LUCIA GIANNINI

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

SILVIA GIOVENTÙ

DDS, Orthodontics specialist
Adjunct professor, Dental Hygiene
Undergraduate Course
University of Milan

MARIA ELENA GRILLO

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

GAIA GUALANDI

DDS, Orthodontics specialist
University of Milan

LUIS TOMAS HUANCA GHISLANZONI

DDS, Orthodontics specialist
University of Milan

FRANCESCO LAGANÀ

MD, Maxillofacial Surgery specialist
PhD in Maxillofacial and Plastic Reconstructive
Sciences
Adjunct professor, Maxillofacial Surgery
University of Milan

GIUSEPPINA LAGANÀ

DDS, Orthodontics specialist
PhD in Materials for Health, Environment
and Energy
University of Rome "Tor Vergata"

DARIO LANZANI

Dental technician

MICHELE LEOPARDI

DDS, Adjunct professor
University of Chieti-Pescara

ROBERTA LIONE

DDS, Orthodontics specialist
PhD in Materials for Health, Environment
and Energy
University of Rome "Tor Vergata"

ALESSANDRA LUCCHESI

DDS, Orthodontics specialist
University researcher
University of Ferrara

CLAUDIA MAGGIPINTO

DDS, Odontostomatological Surgery specialist
University of Milan

SARA MAGISTRO

DDS, Orthodontics specialist
University of Milan

ANGELO MAGNI

Dental technician

GIOVANNI MATARESE

DDS, University researcher
University of Messina

STEFANO MILANI

DDS, University of Milan

ANGELA MILITI

DDS, University researcher
University of Messina

FRANCESCA NOLET

DDS, Orthodontics specialist
University of Milan

RICCARDO SEBASTIANO NUCERA

DDS, Assistant professor
Department of Biomedical and Dental Sciences
and Morphofunctional Imaging
Section of Orthodontics School of Dentistry
University of Messina

VALERIA PAOLONI

DDS, Orthodontics specialist
PhD in Materials for Health, Environment
and Energy
University of Rome "Tor Vergata"

ENZO PASCUTI

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

CHIARA PAVONI

DDS, Orthodontics specialist
PhD in Materials for Health, Environment
and Energy
University of Rome "Tor Vergata"

GAIA PELLEGRINI

DDS, University of Milan

GIULIA PERITI

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

PAOLO VITTORIO PERSIA

DDS, University of Milan

VALENTINA PICOZZI

DDS, Orthodontics specialist
University of Milan

IRENE PITTO

DDS, Orthodontics specialist
University of Milan

GAIA PORCELLINI

DDS, Orthodontics specialist
University of Milan

MARCO PORTELLI

DDS, Orthodontics specialist, PhD
University of Messina

SAMUELE POZZI TAUBERT

DDS, Orthodontics specialist
University of Milan

CESARE PRELLE

Dental technician

GIULIO RASPERINI

DDS, Orthodontics specialist
Tenured researcher
University of Milan

CECILIA REDAELLI

DDS, Orthodontics specialist
University of Milan

ROSSANA RIVA

DDS, Orthodontics specialist
University of Milan

GABRIELE ROSSINI

DDS, Orthodontics specialist
University of Turin

SARA SALVADORI

DDS, Orthodontics specialist
University of Milan

ROSSELLA SERAMONDI

DDS, Orthodontics specialist
University of Milan

ELENA SIGNORELLI

DDS, Orthodontics specialist
University of Milan

DAVIDE SIGURTÀ

MD, Maxillofacial Surgery,
Odontostomatology
and Radiology specialist
University of Milan

ARMANDO SILVESTRINI BIAVATI

MD, Odontostomatology specialist
Tenured researcher
University of Genoa

ROSSANO SOLDI

DDS, Orthodontics specialist
University of Milan

ELENA SOAVE

DDS, Orthodontics specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

FRANCESCO SPADARI

MD, Odontostomatology
and Anatomical Pathology specialist
Associate professor
University of Milan

STEFANO SPERONI

DDS, Odontostomatological Surgery specialist
Adjunct professor, Postgraduate School
of Orthodontics
University of Milan

SANTO ANDREA STABILINI

DDS, Orthodontics specialist
University of Milan

MARIA GIULIA TAVECCHIA

DDS, University of Milan

MARIA VITTORIA TOFFANIN

DDS, Orthodontics specialist
University of Milan

MARCO TREMOLATI

DDS, Orthodontics specialist
Research fellow
University of Milan

ALESSANDRO ZOIA

DDS, Orthodontics specialist
University of Milan

Contents

VOLUME 1

1 ANATOMICAL BASIS OF THE STOMATOGNATHIC SYSTEM .	1	Geniohyoid	45
.1 Anatomy of the stomatognathic system ...	1	Mylohyoid	45
.1 Cranium	1	Stylohyoid	47
Internal surface of the cranial base	1	.8 Mimic muscles	48
External surface of the cranial base	5	Buccinator	48
Occipital bone	6	Mentalis	48
Sphenoid	7	Orbicularis oris	48
Ethmoid	10	.9 Outline of vascularization	
Frontal bone	11	and innervation of the head	49
Parietal bone	12	.2 Embryology of the stomatognathic system	51
Temporal bone	12	.1 Ontogeny	51
Vomer	15	First period:	
Zygomatic bone	16	formation of the primitive layers	51
Inferior nasal concha	16	Second period:	
Lacrimal bone	17	embryonic or organogenetic period ..	53
Nasal bone	17	Stomodeum or primitive oral cavity ..	56
Palatine bone	17	Pharyngeal or branchial arches	56
.2 Mandible	18	Development of the face,	
.3 Maxilla	21	nasal cavities and primary palate ..	58
Frontal, zygomatic,		Formation of the lips and cheeks	58
palatine and alveolar processes	23	Formation of the nasal cavities	59
.4 Cavities and fossae	25	Formation of the secondary palate ..	60
Nasal cavities	25	Development of the tongue	60
Paranasal sinuses	28	Development of the salivary glands ..	63
Maxillary sinus	28	Development of the cranium	63
Frontal sinus	29	Development of cranial	
Sphenoidal sinus	29	or cerebral nerves	64
Ethmoidal cells	29	Muscle formation	65
Oral cavity	29	Mechanisms of bone growth	66
Lips	29	Third period:	
Cheeks	29	fetal or differentiation period	67
Oral vestibule	31	Development of the mandible	67
Oral cavity proper	31	Development of the mandibular	
Structure of the oral cavity	34	condyle	69
.5 Tongue	35	Development of the coronoid process	70
Musculature of the tongue	36	Development	
.6 Salivary glands	38	of the dentoalveolar complex	71
.7 Masticatory system		Development	
and submandibular muscles	38	of the maxillary complex	71
Masseter	41	Bony development of the palate	71
Temporalis	43	Development of the alveolar processes	72
Medial pterygoid	43	Development	
Lateral pterygoid	43	of the facial skeleton	72
Submandibular suprahyoid muscles	44	Development of the cranium:	
Digastric	44	membranous neurocranium	72
		Development of the cranial base	72

Prenatal growth			
of the face and cranium.....	73		
Prenatal growth			
of the nasomaxillary complex	73		
Prenatal growth of the mandible	74		
.2 Odontogenesis	74		
Formation of hard tissues.....	77		
Formation of the root	78		
Formation of supporting tissues	79		
.3 Postnatal craniofacial growth	79		
.1 Mechanisms of bone growth	80		
Calvaria.....	81		
Cranial base	81		
Anterior cranial fossa	83		
Middle cranial fossa	83		
Posterior cranial fossa	85		
.2 Influence of the cranial base growth			
on the nasomaxillary complex.....	85		
Nasomaxillary complex	86		
Mandible.....	90		
Adaptive mechanisms.....	94		
Superior and inferior			
dentoalveolar complexes	95		
Malar region and zygomatic bone	96		
Recommended reading	98		
2 ETIOPATHOGENESIS			
AND TREATMENT TIMING			
OF DYSGNATHIA	99		
.1 Introduction	99		
.2 Orthodontic treatment phases	100		
.3 Etiological factors	101		
.1 Intrinsic etiological factors.....	102		
.2 Extrinsic etiological factors	103		
Oral habits.....	103		
Prolonged finger sucking	104		
Mouth breathing.....	105		
Atypical swallowing.....	108		
Trauma.....	110		
Prenatal trauma.....	111		
Birth trauma.....	111		
Postnatal trauma.....	111		
Asymmetries.....	114		
Classification of asymmetries			
according to location	114		
according to growth.....	115		
Diagnosis			
and treatment of asymmetries.....	115		
Hemifacial microsomia	115		
Post-traumatic asymmetries	116		
Juvenile idiopathic arthritis.....	117		
Occlusal pre-contact	117		
Pre-contact and posture	118		
Recommended reading	120		
<i>Box 2.1 Myofunctional therapy</i>	102		
3 MEDICAL HISTORY: THE FIRST VISIT .	123		
.1 Introduction	123		
.2 Medical history	123		
.1 Family medical history.....	123		
.2 Physiological medical history	125		
.3 Current medical history	125		
.4 Past medical history	126		
.5 Dental specialist medical history	126		
.6 Orthodontic medical history	126		
Social-behavioral assessment.....	127		
Physical development assessment	127		
.3 Clinical evaluation	129		
.1 Extraoral examination.....	130		
Biotype examination	130		
Ectomorph	130		
Mesomorph	131		
Endomorph	131		
Facial examination.....	131		
Frontal examination	132		
Profile assessment	134		
Assessment of mandibular			
physiology and kinesiology	139		
Pathologies of temporomandibular joint ..	141		
Rheumatoid arthritis	141		
Hemifacial microsomia	141		
Hemimandibular hypertrophy.....	141		
Trauma	141		
Evaluation of the stomatognathic			
multifunctions	141		
.2 Intraoral examination	141		
Evaluation of dental development			
and occlusion.....	141		
Evaluation of the soft tissues.....	144		
Recommended reading	145		
4 RADIOLOGICAL INVESTIGATIONS ...	147		
.1 Radiology in orthodontics	147		
.1 Radiobiology and radioprotection	147		
Ionizing radiation	147		
Radiation quantity	148		
Radiation quality.....	148		
X-ray detection systems	149		
Radioprotection	151		
Dose and its units of measurement ...	151		
Effective dose in orthodontic			
radiological diagnostics.....	152		
Radiobiology basics.....	152		
Formation of free radicals	153		
Radiosensitivity and radioresistance..	154		
Radiation damage study.....	154		
Early local lesions	154		
Early systemic lesions	154		
Late lesions.....	154		
Genetic lesions.....	154		
.2 Radiodiagnosics	154		
Traditional radiographic techniques.....	154		
Cephalometric radiograph	154		

Panoramic radiograph	155		
Three-dimensional imaging			
diagnostics in orthodontics	157		
Spiral computed tomography	158		
Computed tomography			
in orthodontics	163		
Traditional computed tomography	163		
Cone beam computed tomography	169		
.2 Cephalometric evaluations			
in the three spatial dimensions	185		
.1 A brief history of cephalometry	185		
Tweed's cephalometric analysis - 1946	185		
Margolis' cephalometric analysis - 1947	186		
Ballard's cephalometric analysis - 1948	186		
Downs' cephalometric analysis			
method - 1948	186		
Wylie's cephalometric analysis			
method - 1948	187		
Steiner's cephalometric analysis			
method - 1953	187		
Sassouni's cephalometric analysis			
method - 1955	188		
Ricketts' cephalometric analysis			
method - 1960	189		
.2 Gianni's cephalometric analysis - 1980	189		
Lateral cephalometric radiograph	189		
Frontal cephalometric radiograph	189		
Dynamic aspect of the future			
and dynamic aspect of the past	194		
Axial cephalometric radiograph	195		
Panoramic radiograph	195		
Clinical cephalometry	198		
.3 Relational algorithms between			
sagittality, verticality and transversality	199		
.4 2D vector cephalometric analysis	200		
.5 From bidimensional cephalometry			
to 3D cephalometry	200		
Limitations of traditional			
cephalometric analysis	202		
Radiographic projection errors	202		
Intrinsic errors			
in the measuring system	202		
Identification errors			
of landmark points	202		
Limitations of cephalometric			
two-dimensionality	203		
Three-dimensional cephalometry on cone			
beam computed tomography	204		
3D cephalometric analysis of the			
Postgraduate School of Orthodontics			
at the University of Milan	205		
Tracing execution	206		
Measurement of volumes	213		
3D vector diagnosis	217		
.6 Clouds of points	218		
.7 Data flow and digital interface			
with laboratory methods	220		
.3 Visualization of the mandibular			
condyle with cone beam computed			
tomography	222		
.1 Visualization			
of the temporomandibular joint	222		
.2 3D visualization with cone beam			
computed tomography scan	223		
.3 3D visualization			
of the mandibular condyle	224		
.4 Cone beam technique			
in the literature	226		
.4 Evaluation of the auxological time	236		
.1 Timing for orthodontic treatment	236		
.2 Evaluation of the ideal auxological time			
for orthopedic-functional treatment	237		
.3 Methods for the evaluation			
of bone maturation	239		
Radiographic evaluation of the wrist			
and hand according to E. Gianni	239		
Evaluation of maturation of the cervical			
vertebrae according to Baccetti,			
Franchi and McNamara	241		
Radiographic evaluation of the second			
phalanx of the middle finger			
according to Hagg and Taranger	241		
.5 Magnetic resonance	244		
<i>Clinical case 4.1</i>	<i>228</i>		
<i>Clinical case 4.2</i>	<i>229</i>		
Recommended reading	254		
<i>Box 4.1 Low-dose computed tomography</i>			
<i>protocol</i>	<i>164</i>		
<i>Box 4.2 Diagnostic applications</i>			
<i>of cone beam computed tomography</i>			
<i>(CBCT) in orthodontics</i>	<i>177</i>		
<i>Box 4.3 Cephalometric landmarks</i>			
<i>in lateral projection</i>			
<i>according to E. Gianni</i>	<i>190</i>		
<i>Box 4.4 Lateral cephalogram</i>			
<i>according to E. Gianni</i>	<i>191</i>		
<i>Box 4.5 Cephalometric landmarks</i>			
<i>in frontal projection</i>			
<i>according to E. Gianni</i>	<i>193</i>		
<i>Box 4.6 Frontal cephalogram</i>			
<i>according to E. Gianni</i>	<i>195</i>		
<i>Box 4.7 Cephalometric landmarks</i>			
<i>in axial projection</i>			
<i>according to E. Gianni</i>	<i>196</i>		
<i>Box 4.8 Axial cephalogram</i>			
<i>according to E. Gianni</i>	<i>198</i>		
<i>Box 4.9 Cephalometric landmarks in cone</i>			
<i>beam computed tomography</i>	<i>208</i>		
<i>Box 4.10 Sagittal measurements</i>	<i>213</i>		
5 INSTRUMENTAL INVESTIGATIONS	263		
.1 Digital photography in orthodontics	263		
.1 Analog vs. digital photography	263		
.2 Key concepts of digital photography	263		

Resolution	263	.3 Rhinomanometric evaluation	292
Charge-coupled device	264	.1 General organization	
Color depth	264	of the respiratory system	292
Color channels	265	Respiratory function	292
Lens, exposure and depth of field	265	Nasal cycle	294
Flash	266	Mouth breathing	295
Camera settings for use in dentistry	267	Etiology	296
Recording formats	268	Local and systemic alterations	296
X-ray digital images: DICOM format	268	Orthodontic implications	297
.3 Digital information management	269	.2 Assessment techniques	
Storage support	269	of the respiratory functionality	298
Digital archive management	269	Assessing nostril reflex according	
Necessary components		to Gudín (1953, 1958)	298
and minimum requirements	269	Glatzel mirror	
Ideal computer characteristics		(Chateau et al., 1959)	298
for the management		Rosenthal test (1933)	298
of clinical photographic archive	269	Investigation of glossoptosis	
Filing	270	or Robin maneuver (1926)	298
Backup	270	.3 Instrumental functionality tests	298
.4 Shooting and framing techniques	270	Cephalometric radiograph	298
Introduction	270	Plethysmography	299
Position and framing	271	Spirometry	299
Extraoral framing	271	.4 Rhinomanometry	299
Intraoral framing	271	New computerized techniques	304
Non-routine framing	274	Conditioning variables	304
Photographing models		.4 Electromyographic	
and equipment	275	and kinesigraphic evaluation	304
Optical isolation	275	.1 Electromyography	304
.5 Medical-legal aspects	276	.2 Kinesigraphy	309
.2 Articulator and condylar position		.3 Operating protocol	310
indicator in orthodontic diagnosis	277	.4 Interpretation	
.1 Gnathological approach		of the electromyokinesigraphic analysis	313
in orthodontic diagnosis	278	Scans 9 and 10	313
.2 Centric relation and centric occlusion	278	Scan 11	313
.3 Importance of the articulator		Scan 1	314
and condylar position indicator	279	Scan 2	314
.4 Mounting on the articulator and use		Scan 3	314
of the condylar position indicator	280	Scan 13	315
Techniques for impression taking		Scan 4	316
and plaster casting	280	Scan 5	316
Bite registration in centric occlusion		.5 Electromyography	
or habitual occlusion	280	and kinesigraphy applications	
Bite registration in centric relation		in dentistry	316
or in a position of maximum joint		.5 Polysomnography	318
stability	281	.6 Postural evaluation	
Mounting on an average-movement		with stabilometric platform	320
articulator	283	Recommended reading	340
Split cast wafer preparation	283	<i>Box 5.1</i> Electromyography:	
Registration		a brief history	306
with anatomical facebow	284	<i>Box 5.2</i> Neuromuscular occlusion	312
Mounting the upper model		<i>Box 5.3</i> Stabilometric examination of patient	
on the articulator	285	with physiological occlusion	
Mounting the lower model		and symmetry of postural tone	327
on the articulator	286	<i>Box 5.4</i> Stabilometric examination of patient	
Condylar position indicator	286	with skeletal Class II malocclusion	
.5 Roth gnathological splint	289	and deep bite with asymmetry	
.6 Conclusions	289	of postural tone	332

Box 5.5 Stabilometric examination of patient with skeletal Class III malocclusion and open bite with asymmetry of postural tone.....	336	Resin portion	366
6 ORTHODONTIC TREATMENT		.4 Function regulator and morpho-corrector	368
AT AN EARLY AGE	347	.1 Theoretical principles of the function regulator mechanism of action.....	368
.1 Introduction	347	Detection of morphological anomalies... ..	368
.2 Sucking	347	Detection of functional anomalies.....	370
.1 Effects of sucking on growth and development of the stomatognathic system.....	348	.2 Treatment options and indications for use.....	372
.2 Effects of pacifier use.....	350	.3 Fränkel function regulator.....	372
.3 Breast-feeding and non-nutritive sucking.....	350	Function regulator type I.....	373
.4 Therapy.....	350	FR Ia.....	373
.5 Spontaneous correction of malocclusion when the habit ceases.....	351	FR Ib.....	374
.3 Mouth breathing	351	FR Ic.....	378
.1 Effects of mouth breathing on growth and development of the stomatognathic system.....	352	Function regulator type II.....	379
.2 Therapy: palatal expansion and respiratory functioning.....	352	FR II.....	379
.4 Atypical swallowing	353	Function regulator type III.....	380
.1 Diagnosis.....	353	FR IIIa.....	380
.2 Correlation between atypical swallowing and malocclusion.....	354	FR IIIb.....	382
.3 Therapy.....	354	Function regulator type IV.....	382
Recommended reading.....	355	FR IV.....	382
7 ORTHODONTIC TREATMENT		.4 How to use the function regulator.....	383
AT THE PUBERTAL GROWTH PEAK	357	.5 Activator in patients with juvenile idiopathic arthritis	384
.1 Introduction	357	.1 Medical history investigation and clinical examination.....	385
.2 Functional appliances	359	.2 Treatment plan.....	389
.1 Dental movement.....	360	.6 Elastodontics in the orthodontic treatment phases	391
.2 Guide to dental eruption.....	360	.1 Elastodontic appliances.....	394
.3 Orthopedic effect.....	360	<i>Clinical case 7.1</i>	397
.3 Activator	361	<i>Clinical case 7.2</i>	401
.1 Construction of the activator.....	362	<i>Clinical case 7.3</i>	406
Study model analysis.....	362	<i>Clinical case 7.4</i>	412
Functional analysis.....	362	Recommended reading.....	417
Cephalometric analysis.....	363	8 ORTHODONTIC TREATMENT	
Construction bite.....	363	IN YOUNG ADULTS	421
Bite opening.....	363	.1 Introduction	421
Preparation of the construction bite.....	363	.2 Correction of transverse problems: rapid palatal expansion	422
Low construction bite with anterior positioning of the mandible.....	364	.1 History.....	422
High construction bite with moderate anterior repositioning of the mandible.....	364	.2 Maxilla expansion and growth.....	422
Construction bite without anterior repositioning of the mandible.....	365	.3 Rapid palatal expansion.....	423
Construction bite with opening and posterior repositioning of the mandible.....	365	.4 Effects of the expansion.....	424
